Professional Experience

PaveNow

Feb 2024 → Sep 2026

Mobile Developer | Poland, Remote

From Feb to Dec 2024, developed Flutter/Dart mobile features for financial products, including invoicing workflows. Continued maintaining the mobile application while expanding into frontend development from Jan to Dec 2025, then began contributing to Go backend services from Jan to Sep 2026.

9Sky-Ventures

Sep 2021 → Dec 2023

Mobile & Frontend Developer | Singapore, Remote

Built and deployed 0-to-1 cross-platform MVP mobile applications using Flutter under strict delivery timelines. Implemented Clean Architecture to decouple business logic from UI, resolving state synchronization and device lifecycle challenges.

Telkom Indonesia

Jun 2021 → Aug 2021

Software Engineer (Internship) | Jakarta, Remote

Automated database maintenance routines and query validation workflows using Oracle SQL and Shell scripting, ensuring high data integrity and reliability across internal database operations.

About

Mobile engineer with 4+ years of experience designing scalable cross-platform applications, clean mobile architectures, and automated test pipelines. Experienced in resolving complex lifecycle, state, and performance bottlenecks across Android and iOS, with published apps and enterprise financial tooling.

Skills

Mobile & Cross-Platform

Flutter · Dart · GetX / MVVM · Clean Arch · App Lifecycle · Automated Testing · Kotlin / Android · Swift / iOS · Offline Storage

Web & Backend

TypeScript · React · SvelteKit · NodeJS · Golang · SQL

Education

Graduated as a **Informatics Major** at *Telkom University*, 2022.

Projects

Trackez

Flutter · Dart

Published cross-platform workout tracking mobile app on Google Play Store with reactive state management, offline-first SQLite caching, custom animation timers, and test-covered workout progression algorithms.

gsheet_to_arb

Dart · Flutter · CLI Tool

Open-source Dart CLI tool automating Flutter localization (ARB) from Google Sheets documents, featuring category grouping, pluralization, and Dart intl codegen.

Kashin

Golang · SvelteKit · Cloudflare D1

Personal finance management system featuring a Go REST API with Chi router, Cloudflare D1 serverless database, JWT authentication, and interactive SvelteKit dashboard with instant demo mode.

Personal Website

SvelteKit · SCSS

The website you're seeing right now. Designed to be pretty, simple, and lightweight.
